

## Paradise in Okhotsk Sea

### A: Sunset on Tuleniy Island (海豹島)

In the end of May, the waters near Tuleniy Island (a point 0.05 km<sup>2</sup> in Okhotsk Sea) get free from ice, and life on the Island begins to blossom. Sea lions occupy their breeding territories. Adult males guard chosen places. Thousands of Guillemots migrate for nesting.

### B: Swimming group of young sea lions

Young sea lions form groups separately from adult males

### C: Spring – Love – Life!

Kittiwakes on the rock

### D: Northern Fur-Seal

Adult male tries to scare people

### E: Brave neighborhood (Slaty-backed Gulls and Northern Fur-Seals)

Very high density of animals is a result of a limited territory

### F: Cleaning of reproductive places by volunteers

by **Olga Mukhametova**  
(SakhNIRO, Russia)

The trip was organized by ecological center “Boomerang” with support of Sakhalin Rescue Squad for cleaning of breeding territories of Island from garbage
